

CORNER TO CORNER GRANNY-STITCH BLANKET

Updated January 2026

This is a crocheted blanket using a Double Crochet stitch and Granny Cluster.

All are **US** terms, measures and definitions.

This makes a square blanket using diagonal rows, starting in a corner.

I used a “J” hook or size 10, and regular medium weight acrylic yarns. This is great for using leftover, colorful yarns.

Instructions were given on YouTube, by “[Play Hooky With Me](#)”

Beginning / Increasing:

Magic ring, or chain 4; slip stitch to form ring.

Chain 3 (counts as first dc). Work 4 double crochets into circle. *You now have 5 double crochets.*

Chain 3, turn.

Do 3 double crochets in the 1st space, then 4 double crochets in the next space. Chain 3, turn.

Do 3 double crochets in the 1st space, in the next space do 3 double crochets (this is the granny cluster). You will do 3 dcs in each space across the row.

NOTE: You will always have 4 double crochets on the sides or ends of your rows AND your chain 3 always counts as your 1st double crochet.

Continue until you want to decrease. Measure your bottom horizontal line for a minimum of **32** inches or **82** centimeters for Project Linus blankets. When your sides are long enough, then you start to decrease.

Decreasing:

After completing a row, chain 3, turn, but instead of working into the 1st space, go into the next space and do the 3 double crochet cluster. At the end of that row do only 1 double crochet, instead of the 4 doubles, in the last space.

Chain 3, turn, skip 1st space and do clusters across ending the row with 1 double instead of 4 doubles. Continue decreasing and complete the last granny cluster.

You can look and count to see that your row is reducing “clusters” on each side.

Finishing:

Fasten off and hide yarn tails, which I do by leaving a minimum of 8” tails and hide in the blanket with a large-eyed tapestry needle. I do a simple border around the blanket, but any border pattern would work.
